

PRODUCT INFORMATION SHEET

LIVE ASSIST PANELS

A POWERFUL & EASY-TO-USE TOOL FOR BUILDING CUSTOMIZED USER INTERFACES

Designed to be a modern back-end system, Live Assist Panels lets you control multiple systems, with a unified, browser-based, easy-to-use interface. A scalable solution, Live Assist Panels allows for a multi-user and multi-device setup, see the illustration below.

Live Assist Panels provides native support for the full ChyronHego product portfolio. Control all your favorite tools such as Lyric Pro & LyricX, the Prime Ecosystem, the Click Effects Family, Paint, Virtual Placement and Live Compositor.

FOR WHO?

Push button automation makes Live Assist Panels a great fit for example for stadium production, where multiple products are typically tied together. Live Assist Panels is also suitable for legislative applications and for non-professional use.

Using the built-in, powerful scripting engine, Live Assist Panels can be used for building custom, small applications such as scoring applications, making it ideal for live sports production. These can be created for all ChyronHego products and offerings.

In addition, an optional hardware interface lets you integrate ultra-low latency video previews into your Live Assist Panels from either SDI or IP video sources, opening up new, creative possibilities. Taking real-time video into the system allows Live Assist Panels to be turned into an advanced, flexible IP-based multiviewer. This is ideal for distributing video previews over an office infrastructure or for providing advanced remote support.

Live Assist Panels - the sky's the limit with this simple, flexible and incredibly powerful solution.

ONE-TO-ONE

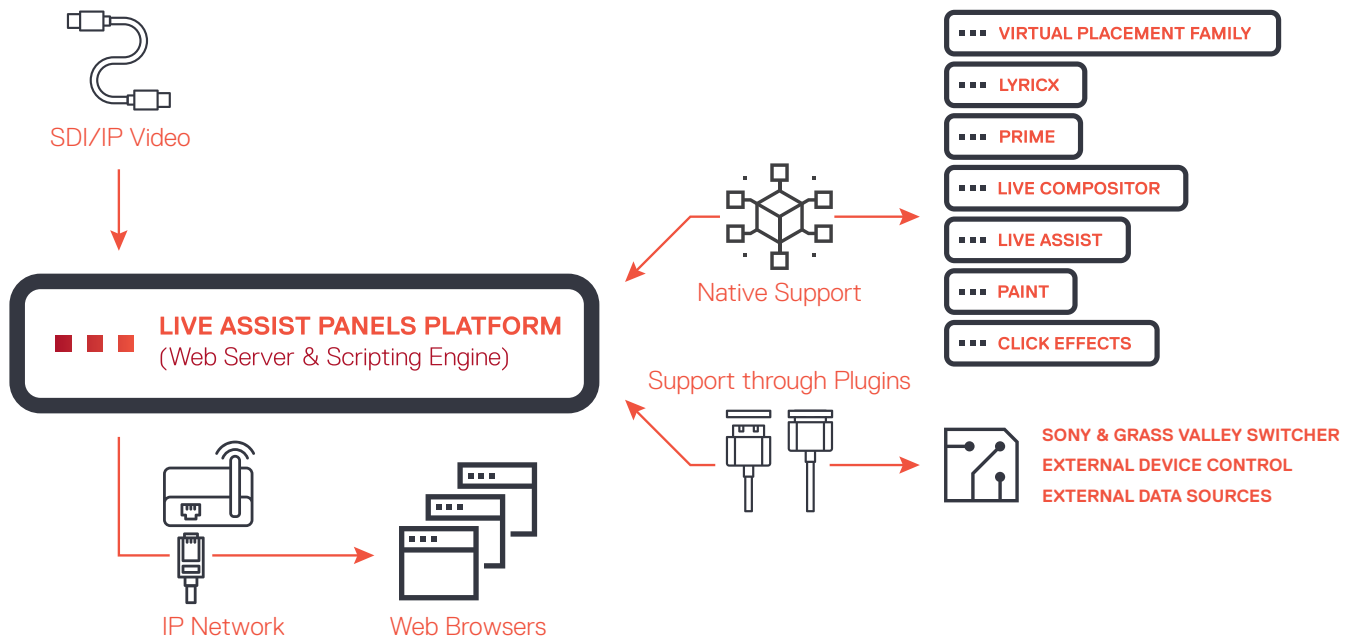

MANY TO ONE: Multiple operators controlling a single device at the same time

ONE TO MANY: One operator controlling multiple devices from an easy-to-use interface

MANY TO MANY: Multiple operators controlling multiple devices

KEY FEATURES

BUILD YOUR OWN CUSTOMIZED USER INTERFACES
