

A Complete Set of Production Tools.

VIDIGO NEWS

PRODUCT INFORMATION SHEET

Optimized for OTT publishing, Vidigo News integrates our renowned ChyronHego graphics authoring tool, your producer-driven newsroom control system, CAMIO, a customizable GUI, scalable switcher, and an audio mixer – everything you need to add another control room - all controllable by a single-operator.

The producer-centric workflow of CAMIO Universe allows editorial to easily create stories in the same way they do for a linear newscast - using the familiar NRCS environment. The inclusion of ChyronHego graphics within Vidigo News ensures that the production of graphics is as seamless as it can be - with the same graphics resources and workflows benefiting both linear and OTT productions. This means your branding will be treated the same way, irrespective of the distribution platform.

A COMPLETE SET OF PRODUCTION TOOLS.

Vidigo News is a scalable, modern newsroom production solution that compliments your current CAMIO workflow.

Vidigo News integrates our renowned ChyronHego graphics authoring tool with your MOS-enabled producer-driven template-based newsroom control system, CAMIO. Along with a custom GUI, scalable switcher, and audio mixer, Vidigo News has everything you need to add another control room – all in one box, and all controllable by a single-operator.

KEY FEATURES

- **A CAMIO Backbone**

Vidigo News imports your templated Lyric Graphic templates via your familiar producer-driven CAMIO bridge for a consistent workflow.

- **LyricX or PRIME Inside**

Our world-renowned graphics are standard in Vidigo News. This provides a familiar GUI for your operators for a fast, seamless workflow.

- **Consistent Branding Across Channels**

Importing your graphics templates into Vidigo News gives you the same creative power to augment your content and insures that your content matches your channel branding, driving your audience to your other branded mediums.

KEY
FEATURES

- **Efficient, Full Production Suite**

With a full technical suite of control panels, switching, audio mixing, a multi-viewer with program and preview, expandable 4, 8, or 12 inputs, a ChyronHego graphics package, and relying on your CAMIO backbone, Vidigo news provides a complete studio from a single work surface.

- **Easy, Single-Operator Control**

Easy-to-operate GUI control panels provide the maximum operational flexibility for your operators. When you are tight on resources, rely on Vidigo News' single-operator control. For advanced users, create custom GUIs per operator creating a faster, personalized production tool.

KEY FEATURES

- **Refined TCO**

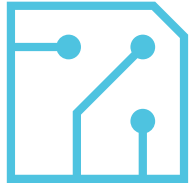

With less dedicated hardware, your CAPEX expenses are lower. Using your Lyric template gallery, Vidigo News' software-based production switcher, and single-operator control means you are producing content faster, with a smaller footprint and lower power consumption – accessing your current resources via familiar CAMIO.

- **Remote Operation**

Control Vidigo News via a Chrome web browser with low latency commands for fast turnaround; one operator can control several Vidigo News solutions.

- **Expansion At Your Own Pace**

With a switcher scalable to 4, 8, or 12 inputs, your content creation can be as trim or complex as you need.
