

TECHNICAL SUPPORT

All of ChyronHego's products come with a six-month or one-year warranty, depending on the product. This warranty provides access to ChyronHego's Customer Success Team during business hours, repair or replacement of defective parts or system, as well as access to software service packs that address issues and improvements.

During the warranty period, customers have the option to purchase an extended support contract, which provides customer 24x7x365 support access.

ChyronHego offers a number of support and maintenance offerings to cater to the specific needs of every customer:

- **Support Contract (SC):**

This agreement gives customer access to ChyronHego's technical support during business hours of the specific region. ChyronHego provides diagnostic support and identifies solutions to a customer's request.

- **Extended Support Contract (ESC):** This agreement gives customers 24x7 access to ChyronHego's Customer Success Team. ChyronHego will provide diagnostic support and identify solutions to customer's requests.

- **Dedicated Support Contract (DSC):**

This agreement assigns a dedicated Senior Success Agent to the customer, who becomes expert in the customer's systems and configurations. Customers with dedicated agents are not part of the standard call queue resulting in lower time-to-resolution. Furthermore, customers under DSC will receive a proactive, on-site support visit once a quarter to preemptively address any potential risk.

- **Software Maintenance Agreement (SMA):**

The Software Maintenance Agreement provides access to software service packs and software updates within the same major version of the software purchased and assigned to a specific system. The SMA includes ChyronHego's Support Contract (SC), which can be upgraded to ESC or DSC.

- **Hardware Maintenance Agreement (HMA):**

The Hardware Maintenance Agreement provides hardware break/fix services and extended warranty to parts. The HMA includes ChyronHego's Support Contract (SC), which can be upgraded to ESC or DSC.

ChyronHego's new subscription offering includes SMA and HMA as part of the offering, as well as access to software and hardware upgrades as described as part of the offering.
